Name: Sandiya

Any fertility problems before you started trying?: Lack of periods for three months. Took provera to bring on period.

How many times have you been pregnant and what were the results of those pregnancies?:

I have never been pregnant before. These will be my first babies.

What kind of medications did you use and what were the dosages and days taken?:

100mg of clomid day 3-7 & natural progesterone cream starting 24-72 hours after ovulation

Did you use OPK's, and if so, when did you get your first positive?:

Day 14

How many DPO did you get your first positive test?:

I was so scared to take a pregnancy test until I was almost six weeks pregnant, I took one and got a strong positive.

How far along were you when multiples were determined?:

Seven weeks! Triplets!
